## Health Plan Inventory: eHealth vs Healthcare.gov

This report contains a comparison of the total number of Affordable Care Act-compliant individual and family health insurance plans presented to consumers through eHealth.com and Healthcare.gov, the federal government’s health insurance marketplace. It includes data on the total number of plans presented across the 33 states included in the survey, broken down by metal level, as well as analyses of plans available by metal level in each state.

eHealth’s analysis shows that there are more than 1,900 additional plans available for consumers to choose from at eHealth which are not available through Healthcare.gov, a difference of 46%. These represent plans which meet the coverage requirements of the Affordable Care Act but which are not eligible for use with government-provided premium tax credits.

## Report Details

This report was based on data collected in December 2014. Plan availability on both Healthcare.gov and eHealth.com is subject to change without notice, and eHealth has no obligation to update this report. Not all plans are available in every part of a state or region, and each consumer may not otherwise have access to all plans offered in a particular state or region. eHealth.com's plan selection page is designed to only show the plans available within that consumer's ZIP code, so eHealth.com does not necessarily display all plans available within each state for every consumer. All plans available for enrollment on Healthcare.gov are listed on the appropriate plan selection page on eHealth.com, but eHealth.com does not have prices, detailed plan information or plan enrollment available for all such plans.
